

Teresa Alexandra Ribeiro Rodrigues

Born in 04.07.1975 at Almeida (Portugal)

Mobil: (+351) 96 678 55 86

email: teresa.rodrigues@lneq.pt or teresa.rodrigues@ipma.pt

PRESENT-DAY INSTITUTIONAL ADDRESS:

Instituto Português do Mar e da Atmosfera (IPMA),
Divisão de Geologia e Georesursos Marinhos,
Estrada da Portela, Zambujal, Apartado 7586, 2721-866 Alfragide, Portugal

EDUCATION

- | | |
|-----------|---|
| 2004-2009 | Doctorate in Marine Science, Universitat Politècnica da Catalunya, Barcelona, Spain |
| 2004-2005 | Diploma Advanced Studies, Universitat Politècnica da Catalunya, Barcelona, Spain |
| 2002-2004 | Master in Geochemistry, University of Aveiro, Portugal |
| 1998-2000 | Diploma in Chemical Engineer, Engineering Institute of Lisbon, Portugal |
| 1993-1997 | Diploma Technical Chemical Engineer, Engineering Institute of Lisbon, Portugal |

CURRENT POSITION

- Jun. 2010- Pos-Doctorate position in the research project “COASTAL UPWELLING, SEA SURFACE TEMPERATURE, PRODUCTIVITY, HYDROLOGY AND ATMOSPHERIC pCO₂ AT PAST EXTREME CLIMATE CONDITIONS” This grant is financed by the “Fundação para a Ciência e a Tecnologia-FCT” and is developed at the: a) Laboratorio Nacional de Energia e Geologia, Unidade de Geologia Marinha (LNEG-UGM) Lisbon Portugal; b) College of Oceanic and Atmospheric Sciences Oregon State University, Corvallis, USA
The major aims of this project is to evaluate the importance of coastal upwelling regions to the global carbon cycle and to evaluate hydrological conditions in the hinterland of the upwelling areas during the two most recent climate extremes periods as during past interglacials on the Portuguese margin. Such investigation will be done by using high-resolution biomarkers (alkenones, n-alkane, n-alcohols) records combined with stable isotope ($\delta^{13}\text{C}$, δD) measurements on those biomarkers.

PREVIOUS SCIENTIFIC / PROFESSIONAL ACTIVITIES

- 2009-2010 Pos-Doctorate position in the research project (Valorización de los recursos naturales de la cuenca hidrográfica del Miño-Minho, Xunta de Galicia-Consejería de Medio Ambiente y Desarrollo Sostenible, programa de cooperación transfronteriza Espanha~Portugal.
- 2004-2008 PhD grant, in the research project “Reconstrução das condições climáticas na Margem Portuguesa durante os extremos interglaciares” financed by the “Fundação para a Ciência e a Tecnologia-FCT” and is developed at the: a) Marine Geology department, Instituto Nacional de Energia Tecnología Industrial (INETI), Lisbon Portugal with the supervision of Professor Fátima Abrantes; b) and Institute of Environmental Assessment and Water Research (IDAE-CSIC), Barcelona with supervision of Professor Joan Grimalt.
- 2003-2004 Research Scholarship, at Marine Geology Department Instituto Geológico e Mineiro (IGM),
- 2002-2003 Master grant with work plan: “Estudo de variações climáticas e inputs terrígenos no Prodelta Tejo através da aplicação de n-alcanos e n-alcoois e do índice U_{37}^{K} ” financed by INGMAR projectd of Marine Geology Department. at Instituto Geológico e Mineiro
- 2000-2002 Training grant on Grain size analyses at sedimentology laboratory of Marine Geology Department. Instituto Geológico e Mineiro
- 1997-1999 Lab. Technician, Promalte Arkady

RESEARCH INTERESTS

The main research scientific areas is to evaluate the importance of coastal upwelling regions to the global carbon cycle and to evaluate hydrological conditions in the hinterland of the upwelling areas during the present and past interglacials on the Portuguese margin. Through the use of high-resolution biomarkers (alkenones, n-alkane, n-alcohols) records combined with stable isotope ($\delta^{13}\text{C}$, δD) measurements on those biomarkers.

MAJOR RESEARCH INTERESTS

Climate Change; Paleoclimatology; Proxies in Paleoceanography; High Frequency Climatic Change; Organic Geochemistry; Environmental Chemistry; Analytical Chemistry.

EXPERTISE

During my career I acquired some skills and competencies on earth and marine sciences. I've a longstanding career in palaeoceanography/ paleoclimatology and I have extensive knowledge in geochemical laboratory techniques and requirements acquired in the Department of Environmental Chemistry; Institute of Environmental Assessment and Water Research (IDAEA-CSIC) during the master and PhD thesis . My general focus has been on sediment samples preparation to Gascromatography (GC) analises, however, I'm also competent in sedimentological and geochemistry analysis and procedures. At UGM- LNEG, I was in charge of implementation and supervised the Biogeochemistry laboratory according with laboratories International Organization for Stardization

Aside from laboratory experience, I have extensive knowledge of many database, graphical and sespecific GC software programs.

OCEANOGRAPHIC CRUISES

Oct. 2003 - Scientific cruise PO304, carried out aboard the German research ship POSEIDON, within the scope of the SEDPORT Project. This collaborative project aims to investigate the impact of strong climatic oscillations that have occurred in the North Atlantic and over adjacent continents. It focusses on sedimentary processes and depositional features on the Portuguese shelf and upper slope. As part of the SEDPORT cruise team aboard POSEIDON members of the Vrije Universiteit Amsterdam (Simon Jung) and the Instituto Geológico e Mineiro de Portugal, (Lúcia de Abreu and Teresa Rodrigues) were responsible for sampling living plankton at stations on a number of transects perpendicular to the Portuguese coast

Sept. 2001- "Training through Research (TTR- 11) Program" on board of the research vessel *Professor Logachev*. Physical, chemical and geological data acquisition on Sea Mountain on the Portuguese EEZ. August 20Th until 3rd September

RESEARCH PROJECTS

International Projects

2012 - Eurofleets "Regional 1" 2010 (European Commission) Long-term effects of continued trawling on deep-water muddy grounds, Coordinated by Margarida Castro, Universidade do Algarve, Portugal.

2012-2015 "Holocene Paleo-climate and hydrological reconstruction on the Upper Guadiana (Tablas de Daimiel), Post-glacial evolution and climate of the Guadiana shelf", Coordinated by: Francisco Jose Lobo, do CSIC-IACT, Granada, Spain

2010-2013 EXCAPA (Vertical exportation of biogenic material in the NW Iberian Peninsula upwelling system). Funded by: Xunta de Galicia (10MDS402013PR). Coordinated by: Dra. Carmen G. Castro Consejo Superior de Investigaciones Científicas, Vigo, Spain.

2009-2011 Natura_Miño_Minho "Valorización de los recursos naturales de la cuenca hidrográfica del Miño-Minho2. Projecto de cooperação transfronteiriça co-financiado pelo Programa de Cooperação Transfronteiriça Espanha-Portugal (POCTEP/FEDER).

2008- 2009 Consolider-Ingenio 2100 Project CE-CSD2007-0067 Coordinated by Joan O. Grimalt Department of Environmental Chemistry; Institute of Environmental Assessment and Water Research (IDAE-CSIC), Barcelona, Spain

2003-2007 Sedport (PDCTM/40017/2003) "Sedimentation Processes on the Portuguese Margin: the role of the continental climate, ocean circulation, sea-level and neotectonics". Coordinated by Ralph Scheneider, University of Kiel, Germany

2003-2006 Holseemer (EVK2-CT-2000-00060) "Late Holocene Shallow Marine Environment of Europe". Coordinated by James Scorse, Bangor University, England

Nationally Funded Projects:

2013-2015 DiatBio PTDC/AAG-GLO/3737/2012) "Cheking coastal upwelling related diatoms' biomarkers: potencial proxy for primary productivity reconstructions" FCT Portugal project. Coordinated by Fátima Abrantes, Divisão de Geologia e Georesursos Marinhos, Instituto Português do Mar e da Atmosfera (IPMA), Portugal

2013-2015 MOWCADYM (PTDC/MAR-PRO/3761/2012) "Surface and Mediterranean Outflow Water Dynamics in the Gulf of Cadiz during the Pleistocene" FCT Portugal project. Coordinated by Antje Voelker, Divisão de Geologia e Georesursos Marinhos, Instituto Português do Mar e da Atmosfera (IPMA), Portugal

2010-2013 CLIMHOL (PDCT/MAR/ 100157/2008) "Holocene climatic variability in the North Atlantic and adjacent landmasses: land-sea direct correlation"; FCT Portugal project. Coordinated by Filipa Naughton, Unidade de Geologia Marinha, Laboratório Nacional de Energia e Geologia, Alfragide Portugal

2010-2013 CALIBERIA (PDCT/MAR/102045/2008) " Multi-proxy Calibration along the NW Iberian margin: Improving paleoceanographic reconstructions ". FCT Portugal project, Coordinated by Emilia Salgueiro, Unidade de Geologia Marinha, Laboratório Nacional de Energia e Geologia, Alfragide Portugal

2004-2008 PORTO (PDCT/MMAR/56282/2004) "Past Ocean Circulation and Productivity Changes on the Portuguese Margin and in the Open North Atlantic: Northern Hemisphere- Antarctic linkages 800,000 to 380,000 years ago". Coordinated by Antje Voelker, Unidade de Geologia Marinha, Laboratório Nacional de Energia e Geologia, Alfragide Portugal

2004-2008 CUPEX (PDCT/MAR/56963/2004) "Coastal Upwelling's Natural Variability: the last two Climate Extremes ($21,000 \pm 2,000$ Cal-yr BP and $8,000 \pm 1,500$ Cal-yr BP)". Coordinated by Fátima Abrantes, Unidade de Geologia Marinha, Laboratório Nacional de Energia e Geologia, Alfragide Portugal

2000-2004 INGMAR (Investigação em Geologia Marina; FCT Portugal project), Coordinated by Fátima Abrantes, Departamento de Geologia Marinha, Instituto Geológico e Mineiro, Alfragide Portugal

COMMITTEE MEMBERSHIPS

Reviewer of project proposals submitted to NWO (Netherlands Organization for Scientific Research Earth and Sciences).

PUBLICATIONS AND PRESENTATIONS

THESIS:

PhD - **Teresa Rodrigues**, High-resolution Climate Study of the Past (570,000 to 300,000 years) and Present Interglacial in the Iberian Margin: a biomarkers view. Universitat Politècnica da Catalunya, pp.315, Barcelona, Spain, November 2009.

Master - **Teresa Rodrigues**; Climatic variation and Terrigenous input in Tagus Prodelta during the last 13,5ka; Geoscience Departement; Universidade de Aveiro, Portugal, February 2004.

PEER-REVIEWED PAPERS:
